EDUCATION

Boston University, Boston, MA |

Bachelor's of Science in Data Science

Class of 2025

WORK EXPERIENCE

Radical AI, New York, NY | *AI Product Management Intern* **September 2024 – January 2025**

- Led development of Kai, an AI teaching assistant, by coordinating cross-functional teams and driving key milestones.
- Redesigned platform interfaces to improve educator usability and satisfaction.
- Developed product roadmaps using stakeholder feedback to align features with user needs and organizational goals.

Landing, New York, NY | *Limelight Intern* **December 2023 – May 2024**

- Fostered creator relationships and innovated content strategies, driving >10K new users/month.
- Launched interactive events and iterated based on user data to increase retention and satisfaction.
- Worked collaboratively across cross-functional teams to identify growth opportunities.

South Central Investment Group, Dallas, TX | *Project Management Intern* **June 2023 – August 2023**

- Researched market demand and modeled investment opportunities, leading to a new sector launch: *Renew Home Design*.
- Managed design and international production—gaining experience in business model development and execution

PROJECTS

BU Spark! Data Visualization Practicum **January 2025 – May 2025**

Office of Police Accountability and Transparency (OPAT)

- Analyzed 5 years of Boston Police data using Python & Power BI, integrating Census data to reveal actionable insights.
- Built interactive dashboards with live API connections, enabling stakeholders to iterate rapidly on policy decisions.
- Chosen to present findings on-stage at university-wide Demo Day.

BU Spark! Data Science 4 Good **September 2023 – December 2023**

Excessive Force & Racial Bias — Internal Affairs Complaints

- Cleaned and categorized 8K+ internal affairs cases, using custom Python scripts to optimize extraction.
- Produced models that surfaced patterns of officer misconduct, supporting non-technical teams in decision making.

College of General Studies Capstone Thesis **March 2023 – May 2023**

U.S. Foreign Policy to Aid Iranian Protesters Through the Use of Sanction Reforms and Technological Developments

- Co-authored 50-page thesis proposing U.S. tech-based support for Iranian protests; built a secure internet prototype.
- Orally defended the thesis against a panel of professors.

COMMUNITY INVOLVEMENT/LEADERSHIP EXPERIENCE

▪ BU Flirts – Founder

Designed a matchmaking platform for students, managing end-to-end operations and user experience.

▪ BU Persian Students Association – Co-Founder

Orchestrated large cultural events and built community engagement strategies.

▪ Girls Who Code – Peer Mentor

Mentored underclassmen Data Science students and provided guidance on academic and career exploration.

▪ BU Computing & Data Sciences – Admitted Student Mentor

Selected to help admitted students navigate BU and the CDS program by offering guidance and personal insight.

HONORS & PROGRAMS

▪ Rewriting the Code

Women-in-tech career development and mentorship program

▪ Enrich Scholars

Career development and mentorship program supporting underrepresented minorities in tech.
